

VEEDA CLINICAL RESEARCH

is a vibrant Anglo / Indian CRO which brings together over 20 years of clinical research expertise. Veeda Clinical Research offers a fully integrated package to meet early clinical development needs. There are state-of-the-art phase I facilities in Plymouth, UK and Ahmedabad, India, and an established biometrics team in Belgium and India. More information can be found on www.veedacr.com.

For the biometrics department in Belgium the company has vacancies for a

STATISTICIAN / STATISTICAL PROGRAMMER

As a Statistician / Statistical programmer you will help in developing Statistical Analysis Plans for various types of clinical studies, surveys, questionnaires... You will be involved in discussions concerning the design of the study and in writing the statistical section of the protocol. You will be in charge of writing, testing and validating SAS programs for statistical analysis. You will be responsible for preparing the statistical tables and/or statistical report and collaborate with the medical writer in charge of the clinical study report. You will be part of an international multidisciplinary team in which you will contribute to various aspects of statistical analyses.

This position requires:

- Bachelor or Master Degree preferably in a scientific discipline (eg. Biomedical Sciences, Biotechnology, Pharmacy, ...). A degree in statistics is an added value.
- Experience of 1 to 5 years and knowledge of clinical trials.
- Verbal and written skills in English as well as Dutch or French.

We offer the opportunity to develop within a growing company, flexible work conditions and a competitive compensation package. We will also assist you as much as possible in reaching your personal and professional goals.
