

Stat-Gent CRESCENDO, an IOF consortium of Ghent University, valorizes statistical know-how. Through contract work for industry, government and research centers (projects, research, training and software development), we generate added value with creative development of state-of-the-art statistical methodology.

To support our contract work activities we currently have an open position for a

STATISTICIAN junior/senior

Description

You will join a growing and dynamic team of enthusiastic statisticians performing contract work for industry, government and research centers. You will apply state-of-the-art statistical methods, under expert guidance, advancing complex problems to produce important answers.

Activities include:

- Defining an approach to data analysis problems
- Interacting with clients
- Developing study designs
- Data handling and data analysis following good statistical practice
- Report writing
- Preparing training material and giving customized training sessions
- Developing software solutions
- Communicating results

The position is a 1-year contract at a level appropriate for the skills and experience brought by the candidate. This may turn into a contract of indefinite duration thereafter. The position is open to be filled as the candidate becomes available.

Profile

- Master degree or PhD in statistics, or the equivalent experience
- Experienced user of SAS and R
- Ability to work independently
- Strong interpersonal and reporting skills
- Fluency in English, verbal and written
- Experience in consultancy, life-sciences and clinical trials are assets

Apply today or before 08/08/2010
